

Visual Output in Processing

CMPT 140

Demo 1

We will draw some lines
and shapes to the screen
using Processing with Python.

Exercise 1

Write Processing code to draw the following shapes using **only** the commands **line**, **ellipse** and **size**:

- (a) Triangle
- (b) Circle
- (c) Hexagon

Blindfolded Rectangle Drawing

Rectangle Drawing

Tell your friend the coordinate
of the top-left corner.

Tell them the width.

Tell them the height.

Exercise 2

Describe **three other ways** that you could use to tell your friend how to draw the rectangle that you want.
